of Engineers®**

## Kenosha Harbor, WI

### Harbor Features

- Located on the west shore of Lake Michigan about 35 miles south of Milwaukee and about 54 miles north of Chicago, IL.
- Authorization: River & Harbor Act of 3 Mar 1899.
- Commercial harbor that currently serves primarily recreational boat traffic.
- The harbor also supports transitory barge traffic.
- Project depths – 21 feet through 27 feet.
- Approximately 5,300 feet of breakwater and pier structures.
- Approximately 5,000 feet of maintained channel.
- Dredged material is placed in the Kenosha confined disposal facility.
- Major stakeholders include the U.S. Coast Guard, the City of Kenosha, and the Wisconsin DNR.

### Project Needs

- Infrequent maintenance dredging is required at the outer end of the entrance channel.
- Navigation structures are primarily maintained by Government floating plant.

### Consequences of Not Maintaining the Project

- Loss of jobs locally.
- Loss of recreational and charter fishing in the area.

### Transportation Importance

- This project serves as an important Harbor of Refuge as well as charter fishing and recreational navigation interests.
- The harbor community has established a significant infrastructure around the harbor facilities that generates income from harbor users and visitors to the area.
